

Electrical Safety Test Engineer (m/f)

Who we are

EMC-Testcenter AG offers international testing and certification services in the fields of EMC, radio technology and SAFETY. We support our customers with a range of services in the development and certification of devices and systems. EMC-Testcenter AG was founded in 1995, is a Swiss SME with 15 employees and an internationally accredited test center (SAS, IECEE CBTL).

What we expect

- Basic electrical training with further training
- Communication skills, enjoyment of customer contact
- Computer user skills (Word, Outlook, Excel, Teams, Adobe Acrobat)
- Analytical understanding and quick comprehension
- Languages German / English
- Ability to work independently and willingness to take on responsibility
- Enjoy team-oriented work and continuous learning
- Knowledge in the field of safety testing would be great but is not a requirement (in-depth training)

Your duties

- Execution of test series and approvals
- Creation of test reports and presumptions of conformity
- Monitoring and maintenance of measuring and test equipment

What we offer

- A varied and responsible role in a great team
- Motivated and highly qualified employees who make it as easy as possible for you to get started
- Modern, spacious and bright working environment
- Good social benefits

Have we aroused your interest? Then give us the chance to get to know you.
